NAZI WAR CRIMES DISCLOSURE ACT
DATE 2000

Current Status of JETTE Project

Authority for action taken for under JETTE ~~some~~ some 3
Project No. 2 to Project DIAZOLO. On this
basis, I am requested to []
the proposed to []
and, setting up a process theory resulting
in a new product. This is to be done
by the second week.

Comments on current basis
are requested to be obtained within week.

BUKHOV, Gennady Subject has shown great improvement in attitude. His progress in English and Spanish has been marked. He now can type between 20 and 30 words a minute. He has recently built a chair in the hobby shop. DIBRALO headquarters staff has requested a reassignment of this individual.

CHIKALOV, Vladimir and Barbara: Their efforts and interest in the work are not satisfactory. Barbara seizes on any pretext to be absent from class, although she has good ability. Vladimir does not exert himself, but thinks that he already knows enough. [] reports that he has been treating Barbara for a "marked state of anxiety". A request for re-assignment has been made by headquarters DIBROBALO.

DALTIN, Victor: Subject's attitude has been excellent. He has taught SIMMER and TOOGAM how to operate the moving picture projector. He takes a great interest in the classes. He has utilised the hobby shop to make frames for his paintings. He is still quite nervous and anxious about his future, but seems to be improving in this respect.

SCHOLZI, David, Margaret and son: David's attitude has shown some improvement during the past month. He works conscientiously on his English and has begun the study of Portuguese by himself—using our Army records and text-books. He has shown an interest in Brazil lately, borrowing books on that country from our library. He has made several toys in the hobby shop for his son Oliver, but his craftsmanship is only fair. Margaret has just recovered from her recent illness and is returning to classes.

Wenem
POPOV, Anton Subject continues to maintain his firm, but polite
resolve not to attend classes. He has complained of an upset
stomach which [] says is a result of nervousness.
All the trainees know that someone is in Building 19 as they
see food being carried there. The prolonged incarceration of
Anton no doubt keeps many of the trainees upset as he was very
popular and the trainees sympathise with his attitude that he
did not belong here and should never have been brought here. It
would help the morale of DTROBALO if Headquarters would take
POPOV from DTROBALO and return him to his parent organisation.
This latter matter will be handled by first requesting for re-
opening of the case.

E. Resettlement Impossible:

1. Subject is insane and has been placed in the Cerebral Hospital.
2. **BARNA, Paul**: Subject is insane and has been placed in the Cerebral Mental Hospital.
